
From booking shows to building artist businesses in *China*

From booking shows to building artist businesses — a first-of-its-kind co-development model with long-term shared ownership.

THE MODEL

One platform. One engine. One *outcome*.

INS PROVIDES

- Venues and live infrastructure
- China marketing and platform access
- Brand, licensing and business relationships
- Local execution capacity

A2G PROVIDES

- Artist development and production
- Release strategy and label access
- Show concepts and content formats
- International creative network

TOGETHER THEY BUILD

- China-ready artist campaigns
- Shows, releases and content moments
- Revenue across live, royalties, licensing, content
- A repeatable system for future artists

WHY THIS WINS

A better model for *everyone*.

TRADITIONAL BOOKING

Pay fee

Run event

*Value ends when the night ends*

CO-DEVELOPMENT MODEL

Invest in activation

Build shows, music, content

*Retain participation in China value*

FIVE HOLDINGS × PACHA GROUP

€302.5M acquisition

\$589M revenue

Venue ownership without artist ownership means perpetual dependency on external booking fees.

€302.5M

Still rents talent

€54K

Co-owns artists from day one

THE TIMING

Why *now*.

\$8.5B 2025 market size → \$19.1B projected 2033

China's electronic music market is at an inflection point. 10.6% CAGR over 8 years.

- 01** Platform prioritization
Douyin, NetEase, and QQ Music are actively prioritizing international content with territorial partnerships. The infrastructure to distribute Western artists in China is ready — the artist pipeline isn't.
- 02** The FIVE gap
FIVE Holdings proved the venue-acquisition model at €302.5M but left an enormous gap: no owned artist pipeline. Venue ownership without artist ownership is a recurring cost, not an asset.
- 03** First-mover advantage
Major Asian nightlife groups are seeking differentiation. The first group to build a co-development artist pipeline will have a defensible competitive advantage that's expensive to replicate.
- 04** Window of opportunity
If INS doesn't capture this model now, another group with similar infrastructure will. The partnerships, label relationships, and production network A2G brings are available today — not indefinitely.
- 05** Low-cost entry
€24K Year 1 investment to test a model that, if proven, scales across unlimited artists using the same infrastructure. The risk-to-upside ratio will never be this favorable again.

The question isn't whether this model works. It's who builds it first.

THE ARTISTS

Three roles.
One *system*.

PROPHECY

Opens doors

Production credibility, international label relationships, release pipeline.

AIRE

Creates content

Immersive DJ×VJ format. Premium visual assets from every activation.

BJÖRN

Proves the local case

INS's homegrown artist — the proof of concept. From local act to internationally positioned name, using A2G's production network.

If the pilot works, the same infrastructure serves every artist after.

Prophecy

International credibility

AIRE

Content engine per show

Björn

Local proof of concept

THE ECONOMICS

Where the money
comes from.

◆

Shows in China

60/30/10% share on every show fee

◆

Royalties + Publishing

China territory streaming + downloads

◆

Licensing

Gaming (Hero E-Sports), brand deals, sync

◆

Content + Merch

A/V assets from every AIRE show

REVENUE SHARE PHASES

01

Recovery

60% INS · 40% Artist

Until INS recoups full investment

02

Profit (3yr)

30% INS · 70% Artist

Artist takes majority, INS retains 30%

03

Long-term

10% INS · 90% Artist

INS retains royalty up to Year 10

INS investment is recouped before artist takes majority share. Zero risk of loss if shows happen.

3-YEAR FINANCIAL PROJECTION — CONSERVATIVE MODEL

Year 1

€44K

total revenue

€24K

INS return

6 shows ~500K streams

Year 2

€179K

total revenue

€53K

INS return

15 shows ~5M streams

Year 3

€495K

total revenue

€145K

INS return

30+ shows ~20M streams

Non-China touring and global catalogue remain outside scope.

YEAR 1 · PROPHECY × INS

Focused. Measurable. Concrete.

WHAT WE WANT FROM INS

- 3 shows at INS venues (30% discount asia rate)
- €10K marketing co-funding (distributed as preferred)
- China Marketing Director (part-time, local execution)
- Distribution: Apple Music, NetEase, Douyin
- Sync/gaming pipeline through Hero E-Sports
- INS partner brand activations
- 3–5 non-INS China shows (€4–5K rate)

WHAT INS GETS IN RETURN

- 40% China-territory revenue until recouped
- Ghost-production: 4 tracks for Björn at €3,500/track (30% off market)
- Up to 3 Prophecy releases on INS label in Year 1
- Label scouting for Björn — fallback: PERSONA Records with promo
- Connections with the biggest industry players
- Support with Björn development
- 30% share for 3yr post-recovery, then 10% to Year 10

INS invests ~€24K Year 1

€10K marketing co-funding + €14K ghost production package (4 tracks at €3,500/track)

YEAR 1 IS SUCCESSFUL IF:

- Prophecy completes 3+ shows at INS venues with >70% attendance
- AIRE content pipeline produces 5+ reusable A/V pieces
- Björn reaches 100K+ monthly listeners on Chinese platforms
- At least 1 ghost-production track for Björn on a Tier 2+ label
- Year 1 revenue reaches minimum €30K (partial breakeven)
- INS has a proven playbook reusable for artist 2

THE OUTPUT

The artist
incubator.

“We don't book artists. We build them.”

EACH ARTIST GENERATES REVENUE FOR INS

RISK MANAGEMENT

Every risk has
a *structure*.

Artist departure	Catalog revenue continues — tracks and assets keep generating income. A2G commits to replacing any artist within the partnership framework.
MEDIUM	
Slower revenue growth	Phase 1 (60/40) has no time limit — it runs until INS recoups investment. No scenario where INS moves to a lower share before recovering capital.
LOW-MED	
Regulatory changes	Distribution through established Chinese platforms (QQ Music, NetEase) with existing regulatory compliance. No gray-area structures.
LOW	
Underperformance	Value-trade model (shows for production) limits cash exposure. Ghost production and content creation continue generating non-cash value even if live revenue underperforms.
MEDIUM	
Early exit	Exit clause after Year 2 with 6-month notice. Existing catalog revenue continues per agreed split. IP ownership proportional to investment made.
STRUCTURAL	

Every failure mode has a contractual or structural response built in. The deal is designed so that INS never loses more than its cash exposure.

NEXT STEPS

What happens *next*.

1

Confirm pilot scope

Agree Year 1 focus: Prophecy as headliner, Björn as local case, AIRE as content engine

2

Confirm economics

Finalize budget, deliverables, recoup mechanics, revenue share structure

3

Launch first cycle

Set timeline, activate China marketing, begin building artist presence

TARGET: FIRST SHOWS Q2-Q3 2026

Let's Build *Together*

If the pilot works, INS doesn't just host talent in China. It starts building artist value in China.
